

Learning the Chapters of the Holy Qur'an

These tabs have been created to help learn the names of the 114 chapters in the holy Qur'an. The aim is to make learning fun! The inspiration and ideas behind these tabs and has come from the QFatima phone app and QFatima website.

How to use:

The tabs are organized in sequence. Each tab consists of a number (the number of the chapter) and an image (an image that will help you remember the name of the chapter).

Firstly you will need to divide your Qur'an using plastic sticky tabs (one for each chapter). The tabs below can then be stuck to each relevant sticky tab. TIP: You can print the images on label paper to making sticking easy!

The images used are not all literal representations. Some humorous images have been added to help remember the name in a fun way. There may be images you don't want to use, but you can use this idea to create your own tabs.
